HVAC CONTROLS SOLUTION PROVIDER

SOLUTIONS | SERVICE | SAVINGS

Born From the Idea... "By consolidating customers products requirements we could negotiate better discounts with supplier, and give customers better prices than they each could obtain on their own." **We launched our operation in June 1997.**

Of course we knew at the onset, that in addition to better prices we had to **make the process of doing business with us as simple as possible.**

As proven by many years of continuous growth, the idea and process have turned out very successful..

Evolving from the original hardcopy catalog to various electronic formats, today we offer an advanced website with online catalog including; technical data, and cart with tools to make the task of **searching and ordering products extremely easy.**

Along the Way... We have maintained our prompt and courteous response to all our customer's enquiries, including human answering of all phone calls, and one (1) hour response time during regular hours of operation.

We are fortunate to enjoy our employees' unwavering commitment to the above, and the support of our loyal customers, which represent the cornerstone of our success since the beginning.

Why Settle for Anything Less? We believe that our service is second to none because our customers keep proving it. Internally at BCCI we measure our success by our ability to meet our customers' needs.

We are always a phone call or email away ... If you don't find what you need in our extensive catalog, we will find it for you.

Moving Forward... We look forward to meeting your future HVAC Control Product Needs with our firm commitment to always ...

'Save Customers Time & Money'
